SUMMARY

Javascript | React | Data Visualization | Full stack

Ambitious computer enthusiast with strong experience in building pixel-perfect interactive data visualization web apps and an active contributor to opensource.

I've worked on scalable, single-solution driven diverse projects
Most of the time I am involved in implementing optimal user experience for the frontend and sometimes developing backend features.

EXPERIENCE

Front End Developer
R Systems, Noida   *Dec 2019 Present*
Currently working on data visualization and real-time asset tracking, health monitoring dashboard. Worked on SEO optimized, dynamic content generated server-side rendered Ecommerce platform.

Front End Developer
Quality Council of India, New Delhi   *Jan 2017 - Nov 2019*
Involved in developing & maintaining in-house data visualized platforms and web apps. Developed scalable solutions to execute huge traffic oriented platforms with varying network coverage.

Salesforce Administrator
HCL, Bengaluru   *April 2015 - Jan 2017*
I was part of a team providing SFDC administrator support to clients, resolving real-time queries, designing and developing SFDC organization structures.

Full Stack Developer
Innovative Medequs, New Delhi   *March 2014 - Jan 2015*
Co-Founded and developed an online healthcare platform to facilitate patient management. Being an early-stage startup I was able to get myself involved in all of the phases of SDLC.
